# MOWING THE LAWN?

## WATCH OUT FOR ANIMALS!

Before you start mowing, check the area carefully.

**10 CM**

If you want to cut tall grass, always do it in two steps: first at about 10 cm height, then at the desired level.

If your mower injures an animal – **act immediately!**  
The sooner you respond, the better the chances of saving it.

Place the injured animal in a cardboard box.  
**Do not feed it!**
